HVRT FORK EXPLAINED..

## HVRT FORK 2.0

Its been 4 years since the first Rondo TwinTip forks hit the markets. Our award winning product has been recognized and approved by thousands of riders around the globe, leaving the competition behind with its unique options of geometry and position adjustment. Here in Rondo we believe in progress and changes that makes lifes easier rather than more complex. With this idea in mind we revised and redesigned our 2020 forks to better suit the needs of our customers world wide.

New HVRT Twintip fork 2.0 has 2 piece flip-chip drop outs and a hex safety screws located on the bottom of the carbon dropout sockets.

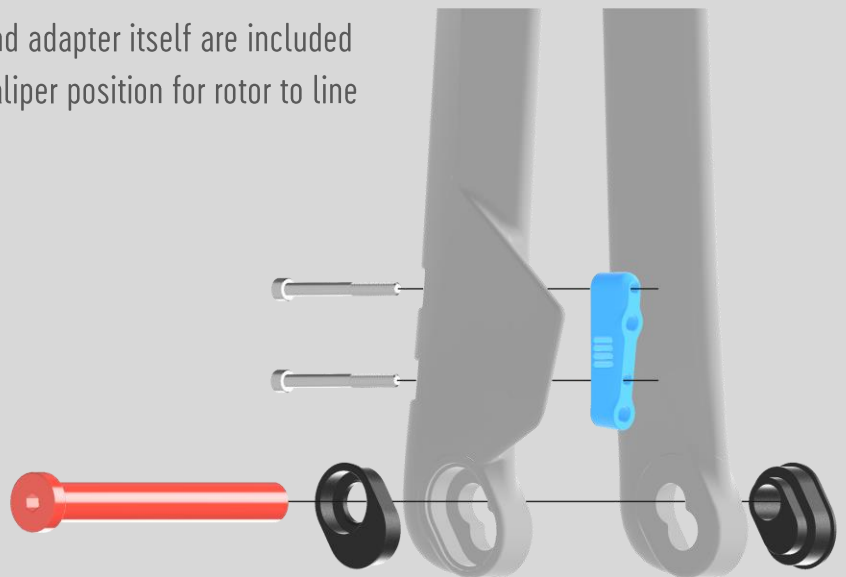

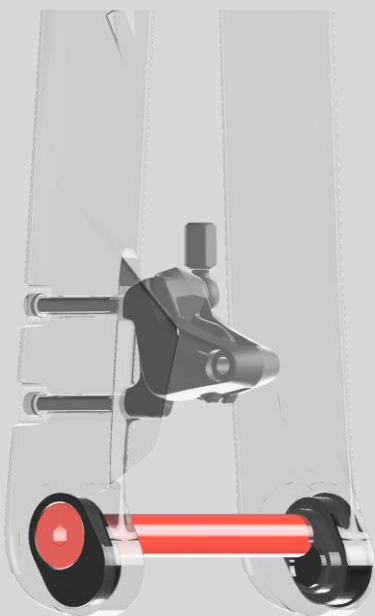

Two stainless hex M5 60mm adapter bolts and adapter itself are included in the package allowing to change brake caliper position for rotor to line in with position change between LO and HI

New revised fork axle is lighter and shorter.

LENGHT: 126,5mm

DIAMETER: 12mm

THREAD PITCH: 1.5
